

FL Shutters

One company does it all! One company designs, engineers, manufactures, installs and provides after-sales warranty! FL Shutters' end-to-end capabilities provide Customer's with Convenience and Ease-of-doing-Business that deliver successful Shutter Projects that exceed expectations and guarantee satisfaction!

Whether you need 1 shutter or 1000, their capacity and experienced capability stand ready to solve all of your shutters needs. FL Shutters produce shutters and shades for homes, condos, hotels, shopping centers, bars, restaurants, cruise ships, RV's and for virtually any opening requiring treatment for looks and functionality. Our customers range from home and condos owners, business owners, commercial property managers, builders, architects, designers and contractors.

FL Shutters ships worldwide!! Their loyal customers span the globe from U.S. Virgin Islands west to Hawaii, and from Canada south to Costa Rica.

FL Shutters has been fast developed into a leading U.S. maker of custom interior and exterior shutters by maintaining customer-focused philosophies committed to delivering satisfaction through world-class design and production.

Major investments into the latest industry-technologies allow FL Shutters to deliver on the customer's expectations of "Attention to Details" during manufacturing and finishing. Utilizing CNC Machine technology for most products, they are able to produce precision fabrication with minimal tolerances, creating an exact fit and the most durable functionality.

Another example of utilizing latest technology is their UV Vacuum Coat Finish-line, where they accomplish the finest finishes available that posse's extreme strength against caustic corrossions and even direct chemical resistances! This UV Vacuum Coat process has zero-emissions, is 100% Green and completely Earth friendly!

At FL Shutters, all fabrication of their products is in the U.S. and they are committed to using U.S. made materials as much as possible.

FL Shutters is a very unique company that provides consultative custom production. Where most companies provide a selection of limited solutions, FL Shutters works with customers to develop limitless designs and applications that make their project dreams become stunning realities. When other companies can't make it or deliver on promise, who do you call? Consultative quality custom production – that is what makes FL Shutters different!

FL Shutters demonstrates great discipline, skill and pride in what they do.

They proudly designed and engineered many of the existing installed hurricane shutters throughout the market and are among the strongest storm-shutters produced in the world today.

Shutter Wall System is a "one of a kind" shutter system offering limitless designs and functionality.

Another unique custom product offering is their Vertical Sliding Shutters that slide up & down to treat tough-to-fit openings found in commercial applications such as bars, concessions and store fronts.

FL Shutters provides 3d engraving, fabrication of metal, plastic and wood separate, or integrated together. They consult and develop designs working with architects, builders or end-users, according to their request, and if the requested products not available, they will design, engineer, test and manufacture to specification. Prototyping is provided for challenging jobs that require design and function demonstration!

FL Shutters welcomes and encourages visitors to tour their production facility to witness how they stand apart in manufacturing unique custom shutters.
